# MATH

Solve the fraction problems.

1. There are 6 people at a table, and  $\frac{1}{2}$  are eating hot dogs.  
How many people are eating hot dogs?

$$\frac{1}{2} \text{ of } 6 = \underline{3}$$

2. There are 18 dishes on the menu, and  $\frac{1}{3}$  of them have beef.  
How many dishes on the menu have beef in them?

$$\frac{1}{3} \text{ of } 18 = \underline{6}$$

3. There are 4 people at a table, and  $\frac{1}{4}$  are eating pizza.  
What is the number of people eating pizza?

$$\frac{1}{4} \text{ of } 4 = \underline{1}$$

4. There are 15 people at the big table, and only  $\frac{1}{5}$  of them are women.  
How many women are at the big table ?

$$\frac{1}{5} \text{ of } 15 = \underline{3}$$

5. One table has 12 people, and  $\frac{1}{6}$  are kids. How many of them are kids?

$$\frac{1}{6} \text{ of } 12 = \underline{2}$$
