ANSWERS

ADDING IMPROPER FRACTIONS

Practice your fraction arithmetic skills by adding the following improper fractions. Be sure to show your work and simplify your answers.

$$\frac{13}{6} \, _{x\,7}^{x\,7} + \frac{19}{7} \, _{x\,6}^{x\,6} = \frac{205}{42}$$

$$\frac{91}{42} + \frac{114}{42} = \frac{205}{42}$$

$$\frac{20}{7} + \frac{13}{5} = \frac{191}{35}$$

$$\frac{4}{3} + \frac{11}{6} = \frac{19}{6}$$

$$\frac{19}{6} + \frac{21}{5} = \frac{221}{30}$$

$$\frac{9}{2} + \frac{31}{6} = \frac{29}{3}$$

$$\frac{22}{5} + \frac{31}{7} = \frac{309}{35}$$

$$\frac{15}{7} + \frac{23}{4} = \frac{221}{28}$$
