

Adding Integers Using Number Lines

You can use a number line to add integers. Start at the first addend. To add a positive integer, move to the right. To add a negative integer, move to the left. The number of units you move is based on the second addend. The number you end on is the sum!

Try it for $-3 + 6$:

So, $-3 + 6 = 3$.

Try it for $7 + (-2)$:

So, $7 + (-2) = 5$.

Use the number lines to add.

$$8 + (-4) = \underline{4}$$

$$-2 + (-5) = \underline{-7}$$

$$-1 + 6 = \underline{5}$$

$$-9 + 9 = \underline{0}$$

$$-7 + (-3) = \underline{-10}$$

$$3 + (-9) = \underline{-6}$$

$$-8 + 7 = \underline{-1}$$
