

Adding with the Hundreds Chart

Count up on the hundreds chart to find the answers to each addition problem.

Answer Key

Remember to pay close attention to how many tens you have. Rewrite the problem to show how many tens you have at the end and how many ones were left over.

Example:

$$23 + 8 = \underline{\quad 31 \quad}$$

$$\begin{array}{r} \text{Look! We ended} \\ \text{up with 3 tens.} \end{array} \quad \begin{array}{r} \text{We ended up} \\ \text{with 1 left over!} \end{array} \quad \underline{\quad 30 \quad} + \underline{\quad 1 \quad} = \underline{\quad 31 \quad}$$

Now you try!

$$44 + 9 = \underline{\quad 53 \quad}$$

$$\underline{\quad 50 \quad} + \underline{\quad 3 \quad} = \underline{\quad 53 \quad}$$
