

# All About Isosceles Triangles

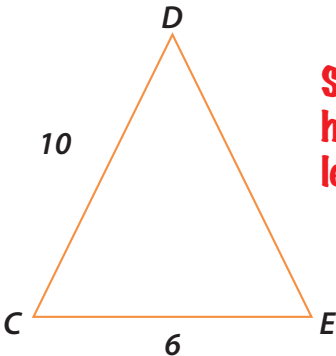

An isosceles triangle has 2 equal angles and 1 different angle. It also has 2 equal sides and 1 different side. Look at the triangles below. Color the isosceles triangles, then answer the questions.

1. Triangle JKL has 2 65 degree angles and 1 50 degree angle. Is it an isosceles triangle? Circle yes or no.

Yes     No

2. Triangle CDE below is an isosceles triangle. Find the length of side DE.

Since isosceles triangles have two equal sides, the length of side DE is 10.
