**ANSWER SHEET**

# Analyzing a Census

**Directions:** Read the passage below and analyze the information provided in the 1930 U.S. Census. Answer the questions using the sentence frames. Reminder: write your sentences using past tense verbs.

Primary source documents tell important information about a subject. A census is considered to be a primary source, since it records current information.

Below is the 1930 U.S. Census for Walt Disney, and his wife. Next door is his brother, Roy Disney and his family. Walt and Roy Disney started Walt Disney Productions in 1923. The company produced movies such as *Bambi*, *Lady and the Tramp*, and *Peter Pan*. It also created Mickey Mouse and built popular theme parks, such as Disneyland and Disney World.

This census was taken right after the company introduced Mickey Mouse in 1928, but before its first big movie, *Snow White and the Seven Dwarfs*.
