## answers Area: Arranging a Carnival

The area is the space inside a two-dimensional shape that has straight lines.

Calculate area by adding up all the squares inside the rectangle, or using the area equation.

Length x Width = Area

Add up the Squares:
There are 42 total square units.
Use the Equation:
$7 \mathrm{ft} \times 6 \mathrm{ft}=\mathrm{A}$
$7 \mathrm{ft} \times 6 \mathrm{ft}=42 \mathrm{ft}^{2}$
$42 \mathrm{ft}^{2}=$ Area

Directions: Find the missing rectangle dimensions for each activity in the table.
