

ANSWER KEY

AREA OF CIRCLES

To find the area of a circle with radius r , you can use this formula:

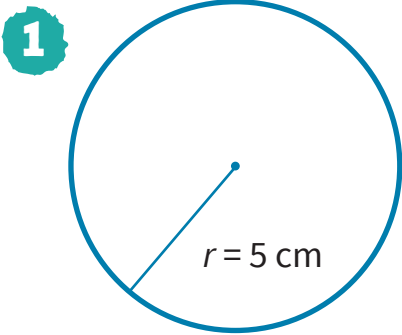

$$A = \pi r^2$$

Try it!
Find the area of the circle. Use 3.14 as an approximation for π .

$$\begin{aligned} A &\approx 3.14 \cdot 3^2 \\ &\approx 3.14 \cdot 9 \\ &\approx 28.26 \text{ ft.}^2 \end{aligned}$$

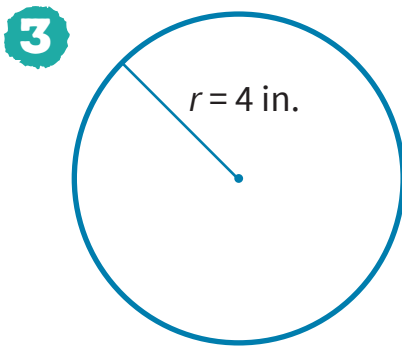

Try it yourself! Calculate the area of each circle. Use 3.14 for π .

$$A \approx \underline{78.5 \text{ cm}^2}$$

$$A \approx \underline{200.96 \text{ mi.}^2}$$

$$A \approx \underline{50.24 \text{ in.}^2}$$

$$A \approx \underline{113.04 \text{ km}^2}$$

AREA OF CIRCLES

Keep going! Calculate the area of each circle. Use 3.14 for π .

5

$A \approx \underline{314 \text{ ft.}^2}$

6

$A \approx \underline{615.44 \text{ m}^2}$

Challenge yourself! Think about how you could use the same area formula to find the area of the circles below. Then calculate the area of each circle. Use 3.14 for π .

7

$A \approx \underline{254.34 \text{ km}^2}$

8

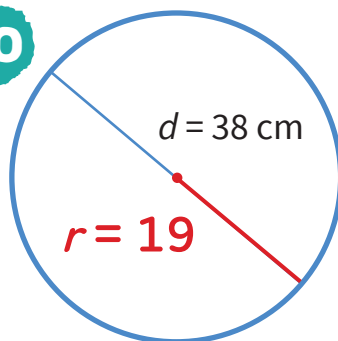

$A \approx \underline{379.94 \text{ yd.}^2}$

9

$A \approx \underline{706.5 \text{ mi.}^2}$

10

$A \approx \underline{1133.54 \text{ cm}^2}$
