

Area of Parallelograms

To find the area of a parallelogram, multiply the **base** times the **height**.
Let's try it! Find the area of the parallelogram below.

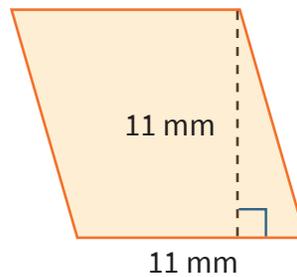

$$\begin{aligned} A &= b \times h \\ &= 5 \times 3 \\ &= 15 \text{ ft.}^2 \end{aligned}$$

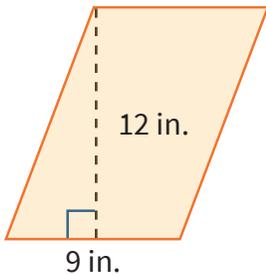

Find the area of each parallelogram.

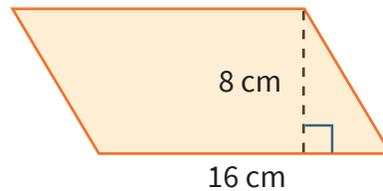

Area = 42 ft.²

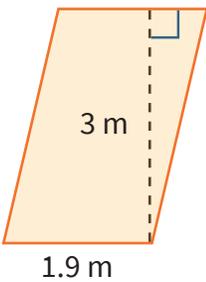

Area = 121 mm²

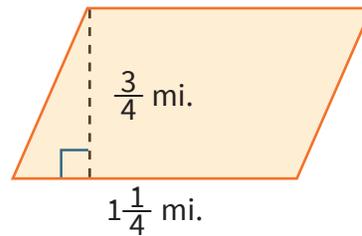

Area = 108 in.²

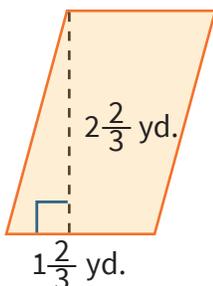

Area = 128 cm²

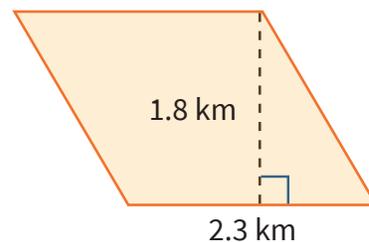

Area = 5.7 m²

Area = 15/16 mi.²

Area = 4 4/9 yd.²
40/9 yd.²

Area = 4.14 km²
