

Calculate the Change! Answer Key

1. Determine how much a packet of gummy bears costs. The number below each coin represents how many of each coin there is in the total cost. Calculate for each coin, then add up to find the total.

				
x 3 =	x 2 =	x 4 =	x 3 =	Total:
.03	+	.10	+	.40
			+	.75
				= 1.28

2. You pay for the gummy bears with a \$5 bill. Calculate how much change you get back. Then, determine how many of each coin you would use to create this amount in the spaces below, using at least one of each coin.

	2 ¢	10 ¢	60 ¢	\$ 3.00
\$5 bill	5.00			
- total	1.28			
= change	3.72	2	2	6
				12
