# Mad Money #2   ANSWERS

Determine how much the scarecrow costs. The number below each coin represents how many of each coin there is. Calculate the amount of each coin.

5   4   7   24

                                                          TOTAL

| .05 | .20 | .70 | 6.00 | $6.95 |

You pay for the scarecrow with a $10 bill. Calculate how much change you get back. Using the highest denomination of coin, write how many of each coin equals the change.

$10 bill	$10.00
Total from above	$6.95
Change	$3.05

____ ¢   .05 ¢   ____ ¢ $3.00
