

Answers**Physical Science**
CHEMICAL vs. PHYSICAL PROPERTIES

Read about the two different types of properties in the boxes below.
Then write each property in the appropriate box.

**Chemical**

Properties that change
the makeup of a substance.

radioactivity

**reactivity
with water**

rusting

**heat of
combustion
(breaking down)**

Properties

color

smell

**reactivity
with water**

boiling point

acidity

**magnetic
attraction
or repulsion**

rusting

**heat of
combustion
(breaking down)**

radioactivity

**Physical**

Properties that do not
change the makeup of
a substance, only its
appearance.

acidity

color

smell

**magnetic
attraction
or repulsion**

boiling point
