

Color-by-Number Cell

The cell is the "building block of life." It is a basic structural, functional, and biological unit of all organisms. Look at the animal cell below, then color it in according to the key.

Color Key

- | | | |
|----------------------------------|--------------------------------------|------------------------------|
| 1. mitochondrion (red) | 5. nucleus (dark blue) | 9. cell membrane (yellow) |
| 2. vacuole (green) | 6. golgi apparatus (orange) | 10. microvilli (light brown) |
| 3. nucleolus (purple) | 7. endoplasmic reticulum (dark pink) | 11. centrioles (lavender) |
| 4. nuclear envelope (light pink) | 8. cytoplasm (light blue) | 12. lysosome (grey) |
