

# Dizzy Over Decimals:

## Dividing Decimals #1

Solve the following division problems. Before you divide, remember to make the divisor a whole number by multiplying both the divisor and dividend by the same power of 10.

$0.4 \overline{)2.56}$ <small>6.4</small>	$0.7 \overline{)9.17}$ <small>13.1</small>	$0.8 \overline{)1.76}$ <small>2.2</small>	$0.5 \overline{)4.18}$ <small>8.36</small>
$0.3 \overline{)12.6}$ <small>42</small>	$0.9 \overline{)14.22}$ <small>15.8</small>	$0.06 \overline{)0.27}$ <small>4.5</small>	$0.5 \overline{)0.89}$ <small>1.78</small>
$0.05 \overline{)3.39}$ <small>67.8</small>	$1.4 \overline{)0.28}$ <small>0.2</small>	$1.9 \overline{)7.6}$ <small>4</small>	$0.16 \overline{)0.92}$ <small>5.75</small>
$2.8 \overline{)3.5}$ <small>1.25</small>	$1.2 \overline{)8.7}$ <small>7.25</small>	$0.19 \overline{)3.8}$ <small>20</small>	$0.25 \overline{)0.419}$ <small>1.676</small>
