

# Make 60

There are 60 minutes in an hour. Let's look at that number more closely so that we can see how it is divided up.

## Factors of 60

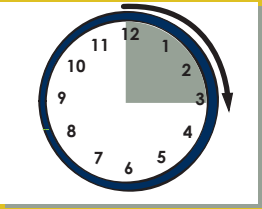

1.  $2 \times \underline{\hspace{2cm}} = 60$

30 minutes

Now do the rest on your own:

2.  $4 \times \underline{\hspace{2cm}} = 60$

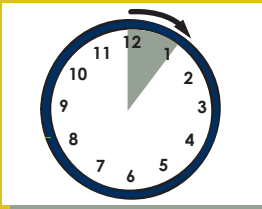

15 minutes

3.  $6 \times \underline{\hspace{2cm}} = 60$

10 minutes

4.  $12 \times \underline{\hspace{2cm}} = 60$

5 minutes

2.  $60 \times \underline{\hspace{2cm}} = 60$

1 minutes
