

Fraction Practice: Part of a Group #1

You can use a fraction to represent part of a group.

Let's try an example! What fraction of the shapes are circles?

Count the number of circles: There is **1 circle**.

Count the total number of shapes: There are **4 shapes**.

So, **1 out of 4** shapes is a circle! Write 1 out of 4 as a fraction:

$$\frac{1}{4}$$

← Number of circles
← Total number of shapes

Write a fraction to answer each question about the groups below.

	<p>What fraction of the fruit are pineapples?</p>
	<p style="text-align: center;">$\frac{1}{7}$</p>
	<p>What fraction of the fruit are strawberries?</p>
	<p style="text-align: center;">$\frac{3}{7}$</p>
	<p>What fraction of the animals are cats?</p>
	<p style="text-align: center;">$\frac{3}{5}$</p>
	<p>What fraction of the animals are sitting?</p>
	<p style="text-align: center;">$\frac{2}{5}$</p>
	<p>What fraction of the cups have straws?</p>
	<p style="text-align: center;">$\frac{5}{8}$</p>
	<p>What fraction of the cups are full?</p>
	<p style="text-align: center;">$\frac{3}{8}$</p>
