

# Geometry: Basic Lines Answers

Basic geometry uses **points**, **lines** and **angles**. The most common terms are defined below.

 <p><b>Line segments</b> have 2 endpoints.</p>	 <p>A <b>ray</b> only has 1 endpoint.</p>	 <p>A <b>line</b> has no ends.</p>	 <p><b>parallel lines</b> AB and CD or <math>AB \parallel CD</math></p>	 <p><b>perpendicular lines</b> AB and CD or <math>AB \perp CD</math></p>
---	--	--	--	---

Identify each line below.

Draw each line below.
