

Geometry: Basic Lines Answers

Basic geometry uses **points**, **lines** and **angles**. The most common terms are defined below.

 <p>Line segments have 2 endpoints.</p>	 <p>A ray only has 1 endpoint.</p>	 <p>A line has no ends.</p>	 <p>parallel lines AB and CD or $AB \parallel CD$</p>	 <p>perpendicular lines AB and CD or $AB \perp CD$</p>
---	--	--	--	---

Identify each line below.

Draw each line below.
