

Interesting Animals: Bats

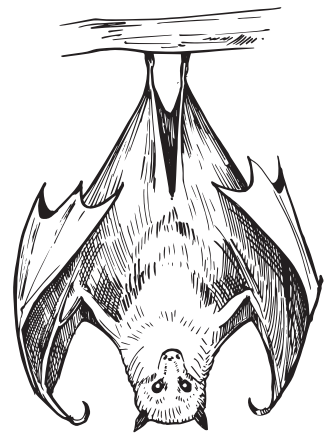

Read the text three times. Color a fruit each time you read.
Then answer the questions below.

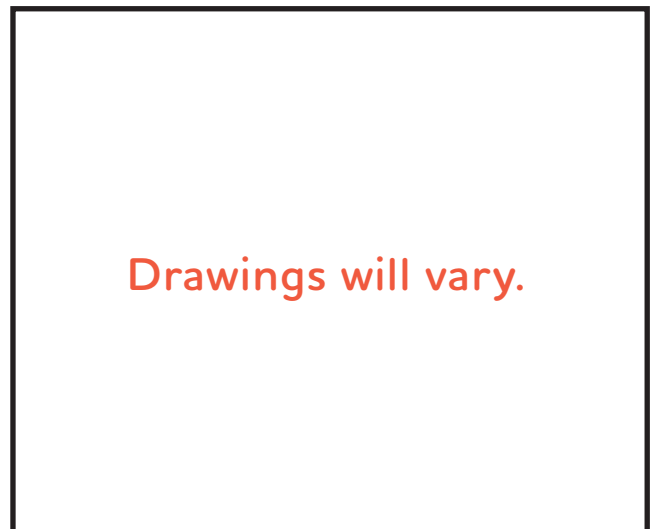

Bats are interesting! Bats are flying mammals. They have fur and nurse their babies. Bats are nocturnal. This means that they sleep in the day and stay awake at night. Bats eat fruit, insects, or nectar from flowers. Bats live all over the world.

Bats can fly.
They also hang upside down.

Draw your own picture of a bat:

Drawings will vary.

1. What do bats eat?

fruit, insects, or nectar from flowers

2. Where do bats live?

all over the world

3. When do bats sleep?

in the day
