

Interesting Animals: Whales

Read the text 3 times.
Color a star each time you read.

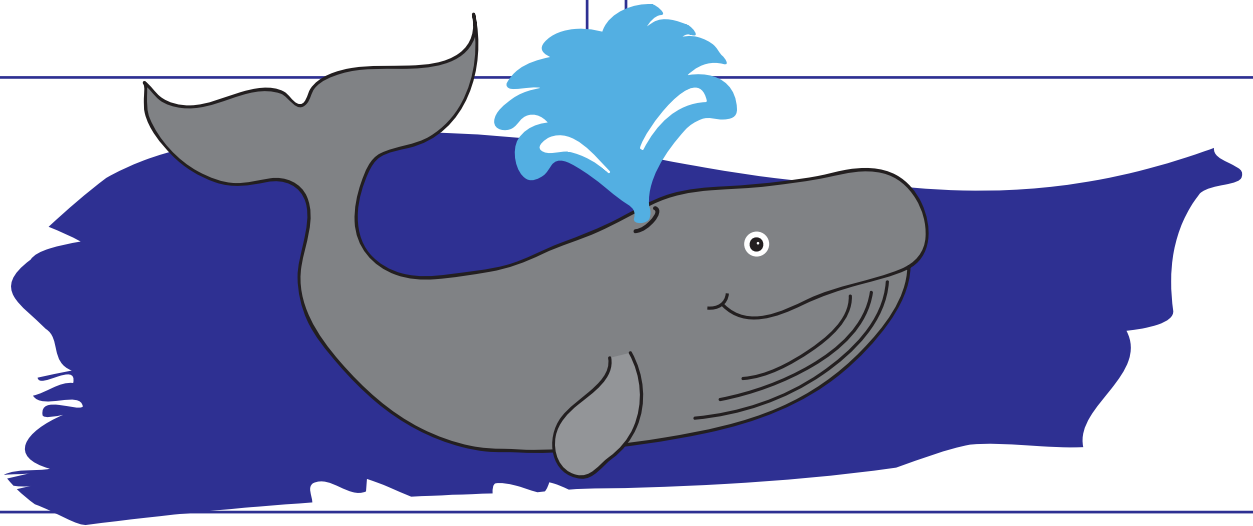

Answers

Whales are mammals who live in the ocean. They are warm blooded, have hair, and breathe air. Whales live together in groups called pods. Whales sing to communicate. Whales can swim many miles.

1. Draw a picture to go with the text.

Student answers will vary.

2. Whales communicate by singing.
3. Whales live in the ocean.
4. Whales live together in a pod/group.
