

The Inverse Relationship of Addition

(answer sheet)

Match the addition equation on the left with its inverse subtraction equation on the right.

$5 + 3 = 8$	$15 - 8 = 7$
$10 + 4 = 14$	$11 - 2 = 9$
$7 + 8 = 15$	$8 - 5 = 3$
$3 + 3 = 6$	$14 - 4 = 10$
$9 + 2 = 11$	$13 - 5 = 8$
$8 + 5 = 13$	$6 - 3 = 3$

Complete the addition problems and then write out its inverse equations.

- 1.) $19 + 5 =$ $24 - 5 = 19$ and $24 - 19 = 5$
- 2.) $8 + 23 =$ $31 - 8 = 23$ and $31 - 23 = 8$
- 3.) $12 + 12 =$ $24 - 12 = 12$
- 4.) $7 + 18 =$ $25 - 7 = 18$ and $25 - 18 = 7$
- 5.) $16 + 11 =$ $27 - 16 = 11$ and $27 - 11 = 16$
