

# Which Angle Is It?

A right angle equals 90 degrees.

An acute angle is less than 90 degrees.

An obtuse angle is between 90 and 180 degrees.

Look at the angles in the shapes below. Label them as right, acute, or obtuse angles. See the example. Note: If you are unsure whether something is a right angle, take a piece of paper, or a book, and place one of its corners inside that angle. If it fits neatly inside, it is a right angle.

angle ABC right

angle HGE right

angle EFG obtuse

angle BCE right

angle EGH right

angle GCH acute

angle ECG acute

angle FGE acute

angle AED right

angle DAB acute
