

Skip-Counting

Directions: Use skip-counting as a strategy to multiply the problems on the page.

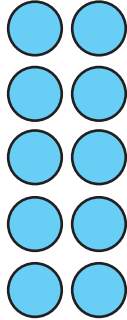

Example:

$$2 \times 4 = \boxed{8}$$

1. Skip-count by five to solve the multiplication problem.

$$5 \times 2 = \boxed{10}$$

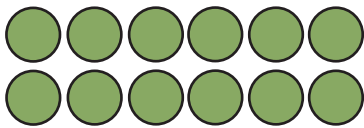

2. Skip-count by five to solve the multiplication problem.

$$5 \times 5 = \boxed{25}$$

3. Skip-count by two to solve the multiplication problem.

$$2 \times 6 = \boxed{12}$$

4. Skip-count by ten to solve the multiplication problem.

$$10 \times 3 = \boxed{30}$$
