

Name: _____

Date: _____

Level Up! Graphing

Directions:

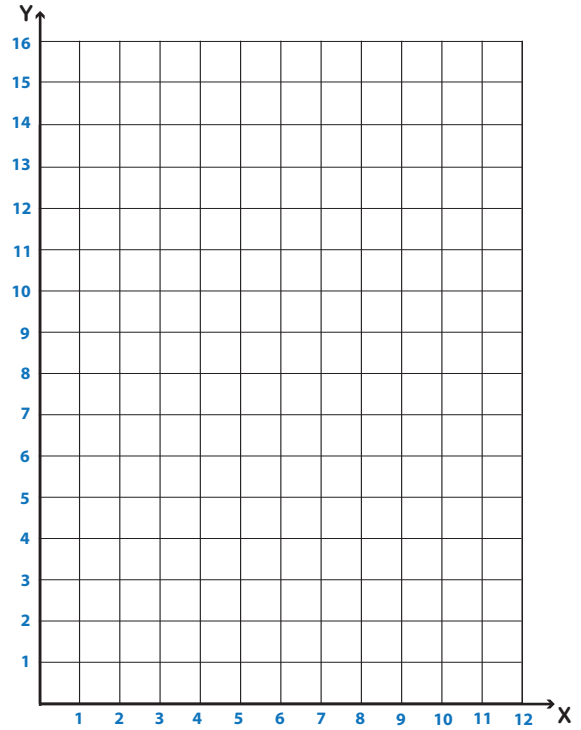

1. Complete the function table.
2. Use the function table to make ordered pairs.
3. Then plot each ordered pair on the coordinate plane.

Rule: $y = x + 4$

x	y
1	5
2	6
3	7
4	8
5	9

Ordered Pairs

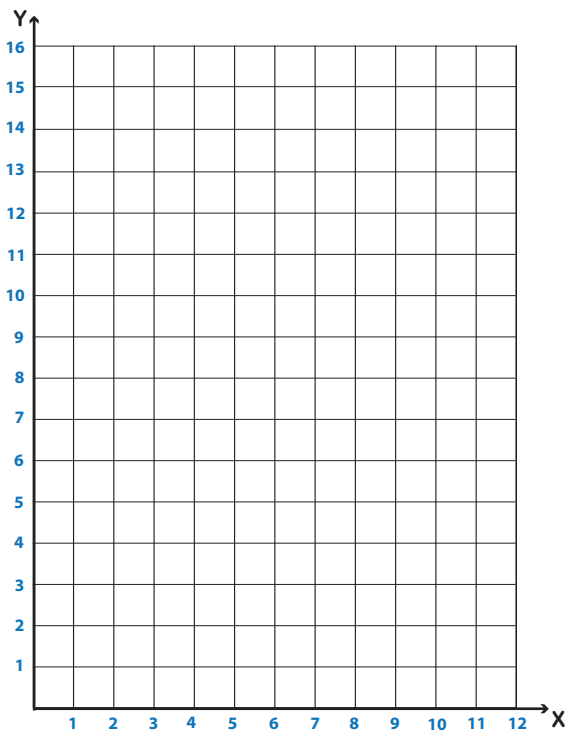

- (1,5)
- (2,6)
- (3,7)
- (4,8)
- (5,9)

Ordered Pairs: (7,5) (6,4) (5,3) (4,2) (3,1)

Directions:

1. Plot the ordered pairs.
2. Make a function table using the points you plotted.

x	y
7	5
6	4
5	3
4	2
3	1

What is the function rule? $y = x - 2$
