

Answer Key**Math Madness: Finding Area 1**

Area is the measurement of the square units inside a shape.

-Adding up the total number of squares within a figure is one way to find the area. This is why we label the units as "square units."

*There is a faster way to find the area of a shape. Area = Length x Width

What is the length? _____

What is the width? _____

Multiply the length x width.

Area = _____ square units

Directions: Record the length and the width of each rectangle. Then use the equation to find the area of the basketball courts below.

What is the length? 10

What is the width? 4

Multiply the length x width.

Area = 40 square units

What is the length? 4

What is the width? 7

Multiply the length x width.

Area = 28 square units

What is the length? 12

What is the width? 4

Multiply the length x width.

Area = 48 square units

What is the length? 6

What is the width? 2

Multiply the length x width.

Area = 12 square units

Draw your own basketball court in the space below. Label the length and width. Then, find the area.
