

Answer Key**Math Madness: Finding Area 2**

Area is the measurement of the square units inside a shape.

-Adding up the total number of squares within a figure is one way to find the area.
This is why we label the units as "square units."

*There is a faster way to find the area of a shape. Area = Length x Width

What is the length? _____

What is the width? _____

Multiply the length x width.

Area = _____ square units

Directions: Record the length and the width of each rectangle. Then use the equation to find the area of the basketball courts below.

What is the length? **9**

What is the width? **3**

Multiply the length x width.

Area = **27** square units

What is the length? **5**

What is the width? **6**

Multiply the length x width.

Area = **30** square units

What is the length? **11**

What is the width? **3**

Multiply the length x width.

Area = **33** square units

What is the length? **8**

What is the width? **2**

Multiply the length x width.

Area = **16** square units

Draw a basketball court in the space below with a length of 6 units and a width of 3 units. Then, find the area.

Student drawings will vary

Area = **18** square units
