# Answer Key

## Metric Measurement

Take a trip to the candy shop to buy some sweets!  
Use the chart to convert the measurements, then  
write your answer in the space provided.

1 gram (g) = 1,000 milligrams (mg)

1,000 grams (g) = 1 kilogram (kg)

1. If you have 200 g of gummy bears, how many mg do you have?

200,000 mg

2. If you have 3,750 g of licorice, how many kg do you have?

3.75 kg

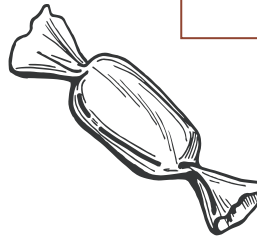

3. If you have 1 kg of candied citron, how many mg do you have?

1,000,000 mg

4. If you have 1,500 g of taffy, how many kg do you have?

1.5 kg

5. If you have 350 g of lollipops, how many mg do you have?

350,000 mg

6. If you have 8,000 mg of caramels, how many g do you have?

8 g
