

ANSWERS

Mixed Problems Requiring Estimation

Find the best estimate by rounding up or rounding down.

None of the possible answers are correct, but one is closer to the correct answer than any of the others. Pick the answer provided that is closest to the correct answer.

1. $327 + 516 = \underline{800}$ a. 80 b. 800 c. 8,000

2. $689 + 173 = \underline{900}$ a. 900 b. 9,000 c. 90

3. $542 + 198 = \underline{700}$ a. 7,000 b. 70 c. 700

4. $263 + 77 = \underline{380}$ a. 38 b. 380 c. 3,800

5. $482 + 237 = \underline{700}$ a. 600 b. 700 c. 800

6. $617 - 426 = \underline{200}$ a. 200 b. 2,000 c. 20

7. $387 + 187 = \underline{600}$ a. 60 b. 6,000 c. 600

8. $871 - 329 = \underline{600}$ a. 60 b. 600 c. 6,000

9. $352 - 51 = \underline{300}$ a. 300 b. 30 c. 3,000

10. $78 + 491 = \underline{580}$ a. 5,800 b. 580 c. 58

11. $789 + 821 = \underline{1,600}$ a. 1,600 b. 1,500 c. 1,700

12. $835 - 263 = \underline{500}$ a. 400 b. 500 c. 700

Challenge:

1. $4,279 + 2,912 = \underline{7,000}$ a. 70,000 b. 7,000 c. 700

2. $3,897 + 5,267 = \underline{8,000}$ a. 8,000 b. 80,000 c. 800

3. $5,933 - 3,361 = \underline{3,000}$ a. 300 b. 3,000 c. 30,000
