

The total price can be found by multiplying the number of items by the cost. Answer the questions below and show your work.

1. Meg bought 20 pairs of socks. Each pair costs \$3. How much did she pay?

$$20 \times 3 = 60$$

She paid \$60.

2. Liz bought 5 school uniforms. Each uniform cost \$100. How much did she pay?

$$100 \times 5 = 500$$

She paid \$500.

3. Darris bought 4 scissors and 2 glue sticks. Each scissor cost \$5 and each glue stick cost \$1. How much did he pay?

$$4 \times 5 = 20$$

$$2 \times 1 = 2$$

$$\text{Total} = 20 + 2 = 22$$

He paid \$22.

Challenge

Emily bought 5 notebooks, 10 pencils, 5 markers, and 2 rulers. Each notebook and each ruler cost \$3. Each pencil cost \$0.20 and each marker cost \$2. How much did Emily pay?

$$\text{Notebooks } 5 \times 3 = 15$$

$$\text{Pencils } 10 \times 0.20 = 2$$

$$\text{Markers } 5 \times 2 = 10$$

$$\text{Rulers } 2 \times 3 = 6$$

$$\text{Total} = 15 + 2 + 10 + 6 = 33$$

Emily paid \$33
