## More or Less

Answer each question, then use the numbered letters to solve the riddle below.

Which has less sides, an octagon or a rhombus?

$$
\underline{\mathbf{R}} \underline{\mathrm{H}} \underline{\mathrm{O}} \underline{\mathrm{~B}} \underline{\mathrm{U}} \frac{\mathrm{~S}}{1}
$$

Which is smaller, a liter or an ounce?

$$
\underline{O} \underline{\mathrm{U}} \frac{\mathrm{C}}{4} \underline{E}
$$

What word means the opposite of"finite"?

$$
\frac{\|}{3}+\frac{\mathbf{N}}{\mathbf{\|}}+\frac{\mathbf{N}}{\boldsymbol{\|}} \frac{\mathbf{E}}{5}
$$

What is the word for lines that are the same distance apart over their entire length?

$$
\frac{\mathbf{P}}{6} \frac{\mathbf{A}}{2}+\frac{\mathbf{R}}{2} \frac{\mathbf{L}}{2} \frac{\mathbf{L}}{2}
$$

What does a geometry teacher eat for dessert?

$$
\text { A } \frac{S}{1} \frac{L}{2} \frac{\boldsymbol{I}}{3} \frac{C}{4} \frac{E}{5} \text { of } \frac{\mathbf{P}}{6} \frac{\boldsymbol{I}}{3} \text {. }
$$
