

# Multiplication and Division Review

Your multiplication and division facts will come in handy when you solve these problems!

Directions: Fill in the missing values. Remember, multiplication and division are inverse operations.

$$5 \times \underline{5} = 25$$

$$6 \times 7 = \underline{42}$$

$$9 \times 9 = \underline{81}$$

$$4 \times \underline{8} = 32$$

$$7 \times \underline{7} = 49$$

$$2 \times 11 = \underline{22}$$

$$12 \times 6 = \underline{72}$$

$$8 \times \underline{5} = 40$$

$$96 \div 12 = \underline{8}$$

$$88 \div 11 = \underline{8}$$

$$9 \div \underline{3} = 3$$

$$12 \div 3 = \underline{4}$$

$$45 \div 5 = \underline{9}$$

$$36 \div \underline{6} = 6$$

$$21 \div 3 = \underline{7}$$

$$18 \div \underline{3} = 6$$

Directions: Write a division equation to solve each problem. Record each answer on the answer line.

1) The county fair is in town for 28 days. How many weeks is the county fair in town?

*Hint: There are 7 days in one week.*

$$28 \div 7 = 4$$

Answer 4 weeks

2) Larry's Lemonades makes 81 liters of lemonade per day. He ships the lemonade to nine grocery stores. How many liters of lemonade does each grocery store receive?

$$81 \div 9 = 9$$

Answer 9 liters

3) Deena and her four friends ate a total of 25 pieces of candy. If each person ate the same amount of candy, how many pieces of candy did each person eat?

$$25 \div 5 = 5$$

Answer 5 pieces of candy

4) 49 community members attended the annual beach clean-up. If the organizer created seven equal groups, how many community members were in each group?

$$49 \div 7 = 7$$

Answer 7 members
