

Multiplication Practice Part 2:

Write the Missing Number

Test your multiplication skills by writing in the correct number to make the problem true.

$8 \times 4 + \underline{8} = 40$

$6 \times 4 + \underline{2} = 26$

$3 \times 5 + \underline{4} = 19$

$6 \times 7 + \underline{10} = 52$

$9 \times 3 + \underline{4} = 31$

$7 \times 4 + \underline{7} = 35$

$5 \times 9 + \underline{11} = 56$

$7 \times 9 + \underline{4} = 67$

$6 \times 2 + \underline{13} = 25$

$8 \times 6 + \underline{4} = 52$

$10 \times 4 + \underline{8} = 48$

$3 \times 1 + \underline{30} = 33$

$6 \times 5 - \underline{3} = 27$

$3 \times 8 - \underline{5} = 19$

$7 \times 2 - \underline{8} = 6$

$6 \times 9 - \underline{4} = 50$

$4 \times 4 - \underline{11} = 5$

$8 \times 9 - \underline{5} = 67$

$8 \times 4 - \underline{12} = 20$

$5 \times 5 - \underline{6} = 19$

$8 \times 6 - \underline{4} = 44$

$9 \times 9 - \underline{8} = 73$

$12 \times 4 - \underline{6} = 42$

$7 \times 4 - \underline{6} = 22$
