

At the Organic Grocery Store

Multiply, Add and Compare

Mom and Aunt have gone to the grocery store. Can you help me compare who spent more?

Step 1

Cost of 1 pound of vegetables x Number of pounds bought = Total cost of vegetables

Mom bought 4 pounds of radishes and 8 pounds of carrots. How much did she spend for each?

x	5	x	1
	4		8
	\$20		\$8

Aunt bought 2 pounds of radishes and 6 pounds of tomatoes. How much did she spend for each?

x	5	x	1
	2		6
	\$10		\$6

Step 2

Total cost of Vegetable 1 + Total cost of Vegetable 2 = Total money spent

+	Total cost of radishes	20
	Total cost of carrots	8
	Total money spent	\$28

+	Total cost of radishes	10
	Total cost of tomatoes	6
	Total money spent	\$16

Who spent more money?

Mom

Aunt
