

Grocery Store Math

Multiply, Subtract and Compare

Aunt Hilda went to the grocery store to buy fruit. She met her friend Florida who was buying fruit, too. Find out how much each of them spent, and then compare to see who has more money left.

Step 1

Aunt Hilda loves apples. She bought 8 of them. What is the total cost?

Cost of 1 apple	4
X	
Number of apples bought	8
TOTAL	\$32

Aunt Florida found the pears very fresh and bought 6 of them. What is the total cost?

Cost of 1 pear	2
X	
Number bought	6
TOTAL	\$12

Step 2

Aunt Hilda had \$50 in her wallet. She gave the shopkeeper the \$50 bill. How much change should she get?

Aunt Hilda had	50
-	
Amount spent	32
TOTAL	\$18

Aunt Florida had only \$20. She gave that money to the shopkeeper. How much change should she get?

Aunt Florida had	20
-	
Amount spent	12
TOTAL	\$8

Who has more money left?

Aunt Hilda

Aunt Florida
