## Order on the Court

**Directions:** Write or paste the events in the flowchart and answer the question.

The main character swerved to avoid Santiago and ran for the net.

The main character ran towards the net and knocked Santiago to the ground.

The crowd booed after the main character knocked over Santiago.

The main character was embarrassed.

How do you think the story could have ended had the main character not knocked over Santiago?

I think if the main character had not knocked over Santiago then the character may still have won the one-on-one. But, Santiago may have stolen the ball and then taken a quick lay-up to the hoop. The time was running out, so it may be that the game would be over and whoever had the largest score would win.
