

Pictures Have a Lot to Say #2

Answers

What can you tell about an animal just by looking at the picture?

Cobi Jerboa

Large ears to listen for predators at night.

Tufted tail for balance and support.

Long hind legs to jump away from predators.

1. What type of creature is this: mammal, fish, reptile, or bird?

Mammal.

2. Why do you think its ears are so large?

To listen for predators.

3. Why do you think it has such long legs and a long tail?

The long legs are for jumping away from predators, and the long tail is for balance.
