# Skip-Counting

Directions: Use skip-counting as a strategy to multiply the problems on the page.
Example:

$3 \times 4 = \boxed{12}$

1. Skip-count by two to solve the multiplication problem.
$2 \times 4 = \boxed{8}$

2. Skip-count by five to solve the multiplication problem.
$5 \times 4 = \boxed{20}$

3. Skip-count by two to solve the multiplication problem.
$2 \times 5 = \boxed{10}$
