

Probability

Answer the probability questions related to the balls shown below.

1. Which color ball is least likely to be drawn at random?

The green ball

2. What is the probability of picking the green ball at random?

1 out of 8

3. What is the probability of selecting a baseball?

3 out of 8

4. What is the probability of drawing a red ball?

2 out of 8

5. Would it be more likely to draw a baseball or a red ball?
Explain your answer.

A baseball. There are more baseballs than red balls.
