Name _____ Date _____
SKIP YOUR WAY THROUGH MULTIPLICATION

Skip counting is a strategy for division problems.

Example: 3 × 4 = __12__

4, 8, 12

I skip counted by **4**. I did this **3** times. **12** is my answer.

Directions: Use skip counting as seen in the example above to solve the following multiplication problems.

1. 3 × 6 = __18__

6, 12, (18)

6 skip counted 3 times

2. 2 × 9 = __18__

9, (18)

9 skip counted 2 times

3. 5 × 5 = __25__

5, 10, 15, 20, (25)

5 skip counted 5 times

4. 9 × 8 = __72__

8, 16, 24, 32, 40, 48, 56, 64, (72)

8 skip counted 9 times

5. 3 × 5 = __15__

5, 10, (15)

5 skip counted 3 times

6. 8 × 3 = __24__

3, 6, 9, 12, 15, 18, 21, (24)

3 skip counted 8 times

7. 7 × 4 = __28__

4, 8, 12, 16, 20, 24, (28)

7 skip counted 4 times

8. 4 × 10 = __40__

10, 20, 30, (40)

10 skip counted 4 times

9. 7 × 6 = __42__

6, 12, 18, 24, 30, 36, (42)

7 skip counted 6 times

10. 4 × 8 = __32__

8, 16, 24, (32)

8 skip counted 4 times
