

Answers

Name: _____

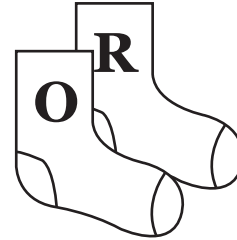

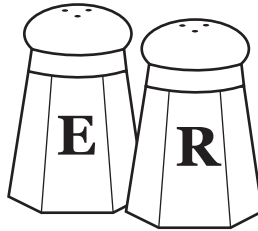

Date: _____

Syllable Partners: Ar, Er, and Or

When you find r-controlled vowels (ar, er, or) inside a word, the vowel and the r are always partners!
They stay inside the same syllable and are not broken up apart into two different syllables.

Example: version → ver- sion

Look closely at each word below. Find the vowel partners and circle them. Then, break apart the word and write each individual syllable on the matching line. The first one is done for you.

Word	Individual Syllables
version	ver- sion
bargain	bar- gain
embark	em- bark
harvest	har- vest
cardinal	car- din al
apartment	a- part- ment
hinder	hin- der
bravery	brav- er- y
permit	per- mit
forlorn	for- lorn
informal	in- for- mal
