Thinking Routine: Parts, Purposes, and Complexities

Directions: Look at the object you're thinking about. List all the parts of the object in the Parts column. Then, list the purposes of those parts in the Purposes column. Lastly, consider how the object or material is complex by thinking about how the parts and purposes interact to make the object/material. Write your conclusions in the Complexities column.

Write the name of the object or tool you are investigating: Adobe Spark

Parts	Purposes	Complexities
<p>A. Spark Video</p> <ul style="list-style-type: none">a. Photos, music, zooming in and out, video clips, voice over <p>B. Spark Post</p> <ul style="list-style-type: none">a. Photos, icons, fonts <p>C. Spark Page</p> <ul style="list-style-type: none">a. Scrolling, visuals, photos, maps, text, text features, stories with visuals <p>D. Social media connected</p> <ul style="list-style-type: none">a. Twitter, Facebook <p>E. Categories of topics for all the major parts (Spark Video, Spark Post, Spark Page)</p>	<p>A. Spark Video</p> <ul style="list-style-type: none">a. The video clips and photos add a visual picture and explanation, while the font and voice overs elaborate on the videos and photos. <p>B. Spark Post</p> <ul style="list-style-type: none">a. Simple, with one picture or more to visually share an idea. For example, one picture just says, "Be Kind", implying that it is something that is very easy and essential.b. Basic fonts can share a message depending on the style. More creative fonts can be beautiful and inspire a playful feeling. Basic fonts with hard edges can convey a message of business and professionalism.c. Icons highlight certain objects, allow for text to exist on top of photos, or complement a photo by adding to it. <p>C. Spark Page</p> <ul style="list-style-type: none">a. The scrolling serves the purpose of highlighting a time span or progression. As images appear and disappear, it reminds me of a slide show that I can seamlessly go back and forth to. But, it is a more smooth, gradual transition.b. Maps and photos add visual information.c. Text and text features share information and the backstory behind the visuals. <p>D. Social media connected</p> <ul style="list-style-type: none">a. They share the work users create. <p>E. Categories</p> <ul style="list-style-type: none">a. They organize the projects from Spark Video, Spark Post, Spark Page to access what you're interested in seeing easily.	<p>A. Spark Video: The parts and purposes work together to provide a visual and auditory experience and information.</p> <p>B. Spark Post: The photos, text, and icons work together to create a simple, straightforward message for billboards, printed photos, etc.</p> <p>C. Spark Page: This serves as an alternative to other tools for sharing ideas. The parts that make up Spark Page work together to package the message the user is trying to share in an innovative and visually stunning way.</p> <p>D. Social media connected: The connection of these platforms helps easily disseminate the information and projects users make.</p> <p>E. Categories: They help organize the information so users can model some of the examples and see products that interest them. This is used with all the different creation tools.</p>
