

# Explore Tornadoes!

phenomenal science

**After reading the article on tornadoes, please answer the following questions:**

What makes a tornado spin? **When warm, wet air collides with cool, dry air causing the storm to spin faster and faster, creating a vortex.**

What is the Fujita Scale? **The Fujita Scale measures a tornado's strength.**

Describe how a tornado moves. **The tornado follows a path that is controlled by its parent thunder cloud. When the vortex is disturbed, the tornado appears to hop and skip.**
