## Answer Key

# Triangle Angles

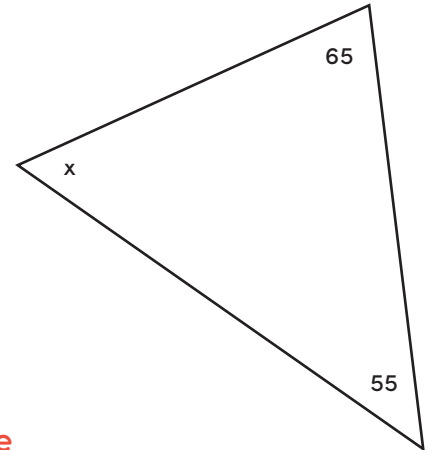

Find the unknown angles in the following triangles.

Write the missing angle and the type of triangle on the lines below each triangle.

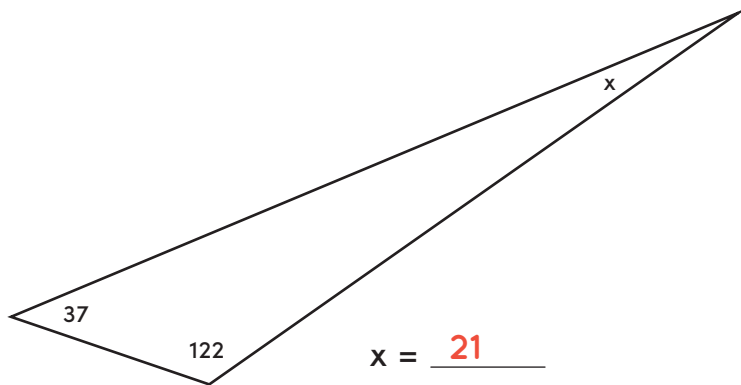

Example

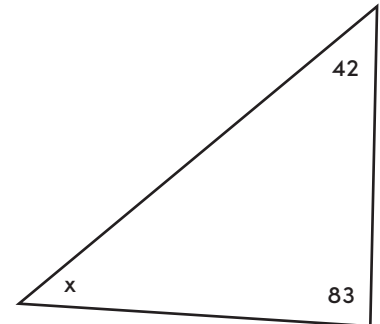

$x = 40$       type = right triangle

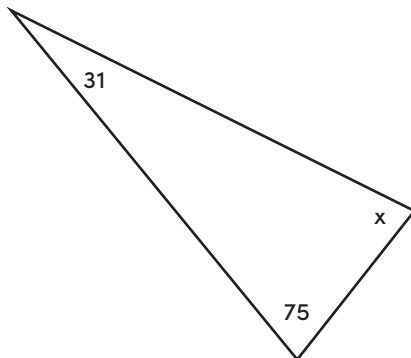

$x = 60$       type = acute

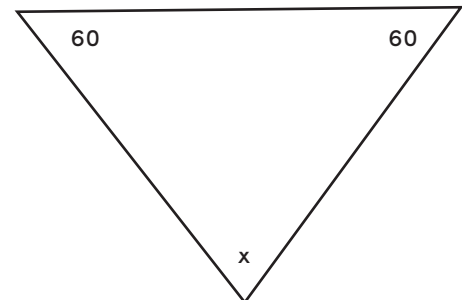

$x = 21$       type = obtuse

$x = 55$       type = acute

$x = 74$       type = acute

$x = 60$       type = acute
