

Using Base 10 Drawings in Two-Digit Subtraction

Draw pictures to solve the two-digit subtraction problems. Draw your picture for the first number and then cross off the amount for the second number in the problem.

Example:

$47 - 31$

Count how many are left!

$47 - 31 = \underline{16}$

Now you try!

$65 - 34$

Count how many are left!

$65 - 34 = \underline{31}$

$73 - 32$

Count how many are left!

$73 - 32 = \underline{41}$
