skills Practice

## ADDING IMPROPER FRACTIONS

Practice your fraction arithmetic skills by adding the following improper fractions. Be sure to show your work and simplify your answers.

$$
\begin{aligned}
& \frac{14 \times 7}{3 \times 7}+\frac{16 \times 3}{7 \times 3}=\frac{\frac{146}{21}}{\frac{98}{21}+\frac{48}{21}=\frac{146}{21}}
\end{aligned}
$$

$\frac{17}{2}+\frac{23}{4}=$

$$
\frac{13}{2}+\frac{17}{7}=
$$

$\frac{20}{3}+\frac{14}{5}=$

$$
\frac{28}{5}+\frac{17}{6}=
$$

$\frac{17}{2}+\frac{30}{7}=$

$$
\frac{15}{2}+\frac{9}{5}=
$$
