Adding Three-Digit Numbers on an Open Number Line #3

Find each sum using the number line.

$200 + 391 = \square$	An open number line with arrows at both ends, intended for drawing a number line to solve the addition problem.
$146 + 103 = \square$	An open number line with arrows at both ends, intended for drawing a number line to solve the addition problem.
$332 + 454 = \square$	An open number line with arrows at both ends, intended for drawing a number line to solve the addition problem.
$265 + 560 = \square$	An open number line with arrows at both ends, intended for drawing a number line to solve the addition problem.
$707 + 249 = \square$	An open number line with arrows at both ends, intended for drawing a number line to solve the addition problem.
