An Adjective Prepositional Phrase Worksheet

A prepositional phrase always begins with a preposition. In a sentence, a prepositional phrase functions as an adjective or as an adverb. When it works as an **adjective**, it **describes a noun** and answers the question "**which one?**"

Put parentheses around the adjective prepositional phrase in each sentence. Then, write the number of the sentence next to the picture it represents.

Be careful, some sentences have adverb prepositional phrases too!
