## JUST JOKING

Q: What is black and white, black and white, black and white?

A: A zebra caught in a revolving door.

## ZEBRA FACTS

Each zebra pattern is unique, like a fingerprint.

When zebras stick together in a herd, the stripes of the zebras blend together. This is confusing to a lion who is looking for a meal.

## Color the Zebra

Zebras have black and white stripes. But you can color this one any way you want to.
