Gloves

The gloves that astronauts wear lock into place.

Arm Pieces

The arm pieces fit into the upper torso.

Lower Torso Assembly

The LTA is the pants of the suit. It has hitches for tools so they don't float away in space.

EV Visor Assembly

This part of the helmet protects the astronaut from sunlight.

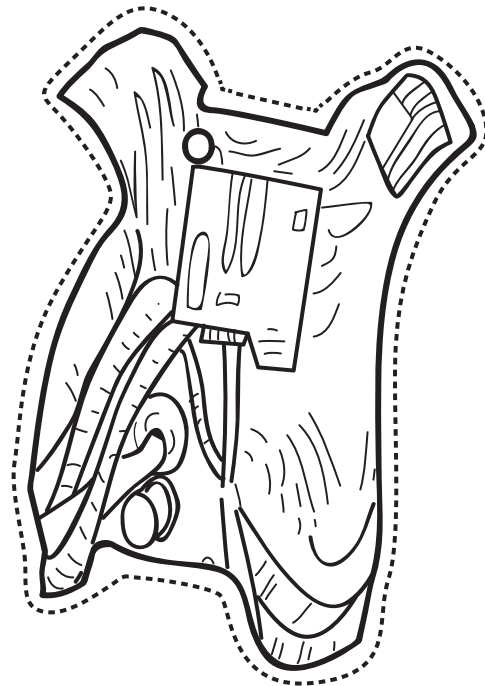

Communications Carrier Assembly

This cap contains microphones that the astronaut can use to speak to crew members and ground control.

Helmet

The helmet is filled with oxygen so the astronaut can breathe in space.

Hard Upper Torso

The HUT protects the chest and carries the Life Support System, which allows humans to survive space by providing air, water, and food within the suit.
