

# Animal Tracks

When traveling to other countries, you might spot the tracks of some unfamiliar animals. Some drag their tails and have big feet, while others have padded paws and claws, or webbed feet. The animals pictured below all live on the continent of Australia, in New Zealand, or on nearby islands.

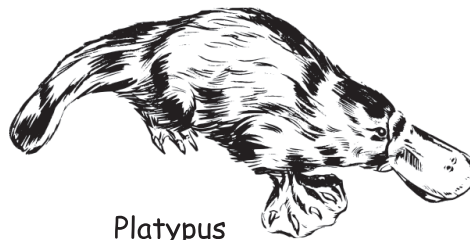

Can you guess which animal left which tracks? Match each animal to its tracks. Write the letter in the box next to the correct tracks.

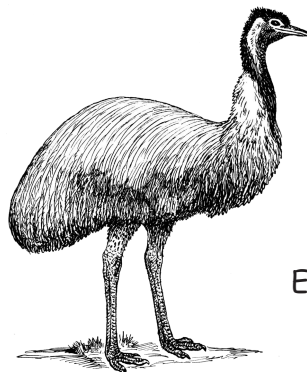

Kangaroo

Dingo

Platypus

Emu

Koala
